1 Overview

1.1 Purpose

To outline the discharge process and follow-up criteria for newborns from Neonatal Intensive Care Unit (NICU) and postnatal wards.

1.2 Scope

Neonatal and maternity staff working in NICU and postnatal wards.

1.3 Patient / client group

Newborns admitted to Waikato DHB.

1.4 Definitions

ANZNN	Australia and New Zealand Neonatal Network		
CDC	Child developmental centre		
cws	Clinical work station		
ENT	Ear nose and throat		
GMA	General movement assessment		
GP	General Practitioner		
HUS	Head Ultrasound		
LC	Lactation Consultant		
LMC	Lead maternity caregiver		
MDT	Multidisciplinary team		
NICU	Neonatal Intensive care unit		
NNP/NNS	Neonatal Nurse Practitioner/ Neonatal nurse Specialist		
OPC	Outpatient clinic		
PFM	Patient Flow Manager		
PT	Physiotherapist		
RMO	Resident Medical Officer		
RN	Registered Nurse		
ROP	Retinopathy of Prematurity		
SLT	Speech language therapist

2 Clinical Management

2.1 Roles and Responsibilities

All Staff to ensure this guideline is adhered to when discharging neonates from NICU or postnatal wards, including SMO, RMOs, NNP/NNS, RN, discharge facilitator, receptionist.

2.2 Guideline

2.2.1 Transfer to another District Health Board

- Transfer of Infants from Newborn Intensive Care Unit (NICU) to Referring Hospital guideline (2710)
- · Discuss with parents
- SMO to SMO handover
- RN handover
- Transfer checklist NICU (<u>Appendix A</u>)
- Discharge letter to include ANZNN follow up (Shift test, HUS, ROP, Bayley's) and surgical or other specialities referrals

2.2.2 NICU discharge and follow up process

2.2.2.1 Discharge checklist / NICU patient admission (A1770HWF (Appendix I)

- Parent education (completed on form A1770HWF and NICU Discharge Education flipchart) (<u>Appendix I</u>)
- Pepi pods parent information/data collection form to be completed by RN
- Inform True colours referral form/parent info (Appendix K)
- Mothercraft (parent pamphlet G1755HWF)
- Home medication chart (email NICU pharmacist)
- · Return of breast pump

	Doc ID:	6230	Version:	1.1	Issue Date:	18 JUN 2022	Review Date:	6 MAY 2025
ĺ	Facilitator Title:		Discharge Facilitator			Department:	NICU	
ı	IF THIS D	OCUME	NT IS PRIN	OR THE DAY OF	PRINTING	Page 4 of 17		

2.2.2.2 Services

- Discharge letter to be completed for all patients discharged from NICU
 - NICU Discharge Letter Guideline (CWS) (<u>Appendix J</u>)
- Neonatal community service referral (Appendix G)
- If meets criteria outlined below, NICU SMO OPC booked via NICU reception, at 6 weeks post discharge, then as required until 2 years of age,
 - discharging clinician to fill out form 'NICU post discharge appointments' (Appendix B), faxed weekly to OPC by receptionist
- VNT follow up for GMA (for those not automatically qualifying)
 - o A yellow referral form to be sent by the medical team
 - Infants with diagnosed syndromes / chromosomal disorders with associated developmental delays
 - o Severe congenital musculoskeletal deformities (E.g. arthrogryposis, spina bifida)
 - Hypotonia/floppy babies
 - Neonatal abstinence where there is neurological/behavioural changes or concerns where a GMA has not been completed
 - Seizure disorders
- CDC GMA follow up with PT (Appendix C)
 - self-referral through MDT meetings
- CDC follow up for <1250g within Waikato DHB (Appendix D)
 - o NICU administrator sends list to CDC monthly
- ROP Ophthalmology follow up at 9 months
 - NICU receptionist to email booking clerk ophthalmology (see <u>Retinopathy of</u> <u>prematurity - ophthalmologic examination and follow-up guideline</u>)
- LMC up to 6 weeks postnatall
- Audiology -
 - Form completed by NICU staff (<u>Appendix E</u>)

2.2.2.3 Specific Referral processes

- ENT -
 - phone call to ENT registrar to arrange follow up, discharging NICU clinician to complete yellow referral form
- General paediatrics (paeds) -
 - yellow referral, clinic appointment to be booked depending on domicile (paeds outpatient have list of SMOs)
 - o Copy of discharge letter to be sent to allocated paediatric SMO (if known)
- Surgical
 - o yellow referral to surgical team involved
- Orthopaedic
 - o yellow referral form to orthopaedic clinic
- Cardiac
 - yellow referral form to cardiology paeds SMO with clinic letter
- Dermatology
 - o Yellow referral form to be send to dermatology.acute@waikatodhb.health.nz
 - Include information such as time of onset (present at birth or later), increase in size/ stable, photographs showing size and distribution

2.2.3 Complex needs patients

- Discharge checklist (<u>Appendix F</u>)
- Referral to Neonatal Community Service (<u>Appendix G</u>)
 - Home oxygen -
 - Order form (G3757HWF) (Appendix H)
 - Parent information booklet (C1443HWF)
 - Tube feeding
 - Parent education (Starship Parent education package, https://starship.org.nz/nasogastric-tube-feeding/)
 - Home feed pump order (email <u>pumpsnz@nutricia.com</u>)
 - Written feeding plan for home (RN or LC to arrange)
 - o Referral to dietitian and SLT (on PFM)
 - If general paeds follow up, see process 2.2.2.3

2.2.4 Post-natal discharge from maternity (see also Admission and Discharge from Maternity Services Ref 5719)

- Discharge letter to be completed for all babies leaving NICU, even if transfer to postnatal wards.
- If clinic appointment required follow same process as for inpatient NICU (see above)

2.2.5 Transfer to Paediatric Ward

Multidisciplinary process involving paeds, medical and nursing team, as well as respective Starship specialists

3 Patient information

Parent education

- · Car seat education
- Parent information booklet Going Home: All you need to know (C1247HWF)
- Parents comfortable drawing up and administering medications (information pamphlets for Vitamin D, Ferrous Sulphate, Sodium Chloride, Caffeine, Phosphate, diuretics, Thyroxine, Gaviscon, Omeprazole)- https://kidshealth.org.nz/tags/medicines
- Complete discharge form (Appendix I, second page)

Appendix C - CDC General Movement Assessment (GMA) follow up with PT

GMAs are currently only completed for patients that reside within Waikato DHB.

Writhing GMA is normally completed at ~35/40 (or once out of level 3) by trained Physiotherapist.

Criteria for assessment:

- < 32/40
- < 1500g
- HIE Stage 2-3
- Encephalopathy of other cause
- Abnormal findings on neuroimaging associated with CP (E.g. IVH)
- · Meningitis or encephalitis
- None of the above but concerns from staff E.g. poor feeding or progress

Writhing GMA outcome:

- Normal: referral to CDC Physiotherapy for routine follow-up and repeat GMA
- Abnormal
 - Poor repertoire: referral to either CDC Physiotherapy (for routine follow-up) or CDC
 VNT (for early intervention) depending on level of concern
 - Hypokinetic: referral to CDC VNT
 - Cramped synchronised: referral to CDC VNT

CDC Physiotherapy:

- Fidgety GMA completed at 12 weeks post term age
 - o If normal GMA and development is on track then patient discharged
 - If normal GMA but mild developmental delays then remain under CDC
 Physiotherapy for early intervention
 - If abnormal at 12 weeks, repeat GMA at 14 weeks post term age. If normal and development is on track, then patient discharged
 - o If abnormal at 12 and 14 weeks post term age, then referral is completed to VNT

CDC VNT:

- Patient seen as soon as able for early intervention. Intervention for high risk infants fortnightly or as deemed appropriate.
- Fidgety GMA completed at 12 weeks post term age, if abnormal then repeated at 14 weeks post term age

Doc ID:	6230	Version:	1.1	Issue Date:	18 JUN 2022	Review Date:	6 MAY 2025
Facilitato	r Title:	Discharge	Facilitator		Department:	NICU	
IF THIS D	OCUME	NT IS PRIN	TED, IT IS \	/ALID ONLY F	OR THE DAY OF	PRINTING	Page 11 of 17

- If absent fidgety or deemed high risk
 - o HINE completed at 3-4, 6, 9, 12 & 24 months corrected age
 - o AIMS completed from 8 weeks corrected
 - NBO for new born
 - SOGS II or Bayley IV (depending on whether meets criteria for baby clinic) as deemed necessary or on discharge

Appendix D – CDC follow up for <1250g within Waikato DHB

Entry criteria

- 1. Babies discharged from the Waikato NBU born weighing less than 1250g
- 2. Premature baby born weighing under 1250g in another hospital and the family have moved to Waikato with baby having care transferred to Waikato DHB

1 Year:

- Families living within the Waikato DHB Region will be offered an appointment, at CDC in Hamilton, when their child is 1 year old (corrected age). This will involve a brief play based developmental assessment (Bayley III screener) and an opportunity for the family to discuss their child's development and health. Families are seen by a Psychologist, Physiotherapist and Neonatal Paediatrician.
- If the child lives outside the Waikato and there are developmental concerns referrals to local services are typically made at discharge from the Waikato NBU. These babies are offered a comprehensive assessment at age 2.

2 Year:

- Involves **all** children that have been discharged from the Waikato Hospital New Born Unit (<1250g).
- Children/families will be invited to attend a developmental assessment when their child is 2 years corrected age. A Psychologist, Speech Language Therapist and Neonatal Paediatrician see the family.
- This involves a full developmental assessment (Bayley III) and opportunity to discuss any family concerns. The anonymised results of this assessment are included as part of the Australia New Zealand Neonatal Network audit project that provides information on how the Waikato babies are doing in relation to other premature babies.
