

Vitamin and Mineral supplementation for neonates

BRIEF ADMINISTRATION GUIDE

For detailed information refer to [The Australasian Neonatal Medicines Formulary](#)

Note: Shaded text indicates where Health NZ Waikato practice differs from ANMF

1. Medicine

1.1. Indications:

Prematurity (see specifics in table under 1.3 Dose)

- For fat soluble vitamin supplementation (Vitamin A, D, E and K) in fat malabsorption conditions, please refer to [Management of Conjugated Hyperbilirubinaemia in NICU procedure \(1486\)](#)
- For calcium and phosphate supplementation for metabolic bone disease, please refer to [Metabolic Bone Disease of Prematurity \(6474\)](#) and the [calcium oral \(2903\)](#) and [phosphate oral \(6370\)](#) guidelines
- For vitamin K (phytomenadione) refer to [Vitamin K \(phytomenadione\) for neonates \(2980\)](#)
- For iron refer to Iron (ferrous sulfate) for neonates guideline (6629)

1.2. Route and Presentation:

Oral

- Retinol (Vitamin A) supplied as Vitamin A oral drops 333.3 microgram per 1 drop (=1111 units per drop) (prepared by Optimus)
- Cholecalciferol (Vitamin D) supplied as cholecalciferol oral drops 10 microgram per 1 drop (= 400 units per drop) (Puria®)
- Folic acid available as 50 microgram/mL oral liquid (prepared by Biomed)

Note: vitamin A (Optimus brand) and folic acid (Biomed brand) are Section 29 products

1.3. Dose:

Supplement	RDI	Indication	Dose	Duration
Retinol (Vitamin A)	250 microg/day	<37w or <2.5kg, *hold dose while on SMOF lipid	333microgram = 0.03ml daily	Until discharge (<u>not</u> prescribed on postnatal ward)
Cholecalciferol (Vitamin D)	5 microg/day 400-1000 IU/day	<ul style="list-style-type: none"> • all infants from Day 1, *hold dose while on SMOF lipid • low serum vitamin D levels 	If current weight is ≤ 1 kg give 2 drops once daily If current weight is > 1 kg give 1 drop once daily	Until first birthday (prescribe for babies on postnatal ward)
Folic acid	50 microg/day	<37/40, Breastmilk only (at least 50%)	1ml (50 microgram) daily	Until discharge (<u>not</u> prescribed on postnatal ward)

2. Preparation and Administration

2.1. Compatible fluids:

Breastmilk, artificial formula, sterile water for dilution

2.2. Administration method

- Draw up prescribed dose in an oral syringe or use dropper provided with the bottle

2.3. Monitoring:

- As per clinical requirements (no special monitoring required for vitamin supplementation)

Vitamin and Mineral supplementation for neonates

2.4. Storage and Stability

- Store at room temperature, below 25°C
- Vitamin A: Once opened, store refrigerated and discard after 60 days.
- Vitamin D: Once opened, use within 90 days.
- Folic acid: Discard 7 days after opening
- Bottles for all supplements are shared between babies **except cholecalciferol (Vitamin D)**. Each baby should be given their own cholecalciferol bottle to ensure the dropper remains clean.

2.5. Competency for Administration:

This procedure is carried out by, or under, the direct supervision of a registered nurse/registered midwife who holds current Health NZ Waikato Generic Medicine Management skills verification.
